Statement of Volatility
Phaser 3200MFP
Statement of Volatility
Phaser 3200MFP

Notice

This document describes the locations, capacities and contents of volatile and non-volatile memory devices within the Phaser 3200MFP.

The context of the information in this document is that normal means of access or data extraction are being attempted in order to reproduce, read, or extract stored or latent data. This does not include attempts to reproduce, read or extract data or reverse engineer storage methods by individuals or organizations with advanced skills or through the use of extraordinary resources and measures or specialty equipment not normally available in the industry or to the public.

The content of this document is provided for information purposes only. Performance of the products referenced herein is exclusively subject to the applicable Xerox Corporation terms and conditions of sale and/or lease. Nothing stated in this document constitutes the establishment of any additional agreement or binding obligations between Xerox Corporation and any third party.
Statement of Volatility
Phaser 3200MFP

Introduction
The Phaser 3200MFP is used to perform the following tasks:

- Printing
- Copying
- Scanning
- Faxing

This document describes the amounts and types of memory contained in the device in an easy to read tabular format. To allow security issues to be addressed as needed, specific commentary has been included about job data and where Personally Identifiable Information (PII) can be found in the system.

The information contained in this document has been verified at the time the product is released for sale. Manufacturing process changes may require that memory amounts are increased but, the purpose or contents of the memory should not change.

General Memory Information

Volatile Memory

All volatile memory listed is cleared after power is removed (decay occurs generally within 20 seconds at room temperature).

All volatile memory listed is required for normal system operation and during service and diagnostic procedures.

Removal of any volatile memory will void the warranty.

Non-Volatile Memory

All non-volatile memory listed is required for normal system operation and during service and diagnostic procedures.

Removal of any non-volatile memory will void the warranty.

None of the non-volatile memory in the system can be accessed by accidental keystrokes.
Signature Block

Device Module Descriptions

The data tables below detail the information regarding the volatile and non-volatile memory contained in the Phaser 3200MFP print engine.

### Volatile Memory Description

<table>
<thead>
<tr>
<th>Type (SRAM, DRAM, etc)</th>
<th>Size</th>
<th>User Modifiable (Y/N)</th>
<th>Function or Use</th>
<th>Process to Clear:</th>
</tr>
</thead>
<tbody>
<tr>
<td>SDRAM</td>
<td>64MB</td>
<td>N</td>
<td>Swath Buffer in Printing, Scan Buffer in Scanning, ECM Buffer in FAX receiving, and System Working Memory</td>
<td>Power Off System</td>
</tr>
</tbody>
</table>

**Additional Information:**
Some of memory listed above contains user or job data in a proprietary format temporarily while jobs are being produced. The information is stored in random order and removed as marking takes place. No user or job data is permanently stored in these locations.

### Non-Volatile Memory Description

<table>
<thead>
<tr>
<th>Type (Flash, EEPROM, etc)</th>
<th>Size</th>
<th>User Modifiable (Y/N)</th>
<th>Function or Use</th>
<th>Process to Clear:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flash</td>
<td>16MB</td>
<td>via Diagnostics</td>
<td>Firmware, System Program, configuration setting and Font.</td>
<td>Diagnostic</td>
</tr>
</tbody>
</table>

**Additional Information:**
All memory listed above contains code for execution and configuration information. No user or job data is stored in these locations.
Feeder and Finisher Module Descriptions

The text below details the information regarding the volatile and non-volatile memory contained in the Phaser 3200MFP supported feeders and finishers. This document lists the available options. Depending on the configuration purchased, your system will contain on or more of these devices. **NOTE: None of these devices store any job data in electronic form.**

**Feeder Module Descriptions**

No additional feeder available on Phaser 3200MFP.

**Finisher Module Descriptions**

No finisher available on Phaser 3200MFP.

**Third Party finishing devices**

No third party finishing devices available on Phaser 3200MFP.
