Statement of Volatility

Phaser 6600

Notice

This document describes the locations, capacities and contents of volatile and non-volatile memory devices within the Phaser 6600.

The context of the information in this document is that normal means of access or data extraction are being attempted in order to reproduce, read, or extract stored or latent data. This does not include attempts to reproduce, read or extract data or reverse engineer storage methods by individuals or organizations with advanced skills or through the use of extraordinary resources and measures or specialty equipment not normally available in the industry or to the public.

The content of this document is provided for information purposes only. Performance of the products referenced herein is exclusively subject to the applicable Xerox Corporation terms and conditions of sale and/or lease. Nothing stated in this document constitutes the establishment of any additional agreement or binding obligations between Xerox Corporation and any third party.

Statement of Volatility

Phaser 6600

Introduction

The Phaser 6600 is used to perform the following tasks:

- Printing

This document describes the amounts and types of memory contained in the device in an easy to read tabular format. To allow security issues to be addressed as needed, specific commentary has been included about job data and where Personally Identifiable Information (PII) can be found in the system.

The information contained in this document has been verified at the time the product is released for sale. Manufacturing process changes may require that memory amounts are increased but, the purpose or contents of the memory should not change.

General Memory Information

Volatile Memory

All volatile memory listed is cleared after power is removed (decay occurs generally within 20 seconds at room temperature).

All volatile memory listed is required for normal system operation and during service and diagnostic procedures.

Removal of any volatile memory will void the warranty.

Permission to post to a restricted database is not permitted

Non-Volatile Memory

All non-volatile memory listed is required for normal system operation and during service and diagnostic procedures.

Removal of any non-volatile memory will void the warranty.

None of the non-volatile memory in the system can be accessed by accidental keystrokes.

Permission to post to a restricted database is not permitted

The data tables below detail the information regarding the volatile and non-volatile memory contained in the Phaser 6600 print engine.

Volatile Memory Description				
Type (SRAM, DRAM, etc)	Size	User Modifiable (Y/N)	Function or Use	Process to Clear:
SDRAM	256MB	N	Executable code, Printer control data	Power Off System
Optional SDRAM	512MB	N	Executable code, Printer control data	Power Off System
Additional Information: All memory listed above contains code for execution and configuration information. No user or job data is stored in these locations. Contents of memory is lost within twenty seconds of power off.				

Non-Volatile Memory Description				
Type (Flash, EEPROM, etc)	Size	User Modifiable (Y/N)	Function or Use	Process to Clear:
EEPROM	1MB	via Diagnostics	Control setpoints, configuration settings	Diagnostic
Flash	8MB	via Diagnostics	Firmware	Diagnostic
Flash	8MB	via Diagnostics	Firmware	Diagnostic
EEPROM	1MB	via Diagnostics	Control setpoints, configuration settings	Diagnostic
Flash	8MB	via Diagnostics	Firmware	Diagnostics
Additional Information: All memory listed above contains code for execution and configuration information. No user or job data is stored in these locations. Contents of this memory is retained after power is removed.				

Hard Disk Descriptions					
Complete this table if the device has media storage capability					
Drive / Partition (System, Image):	Removable Y / N	Size:	User Modifiable: Y / N	Function:	Process to Clear:
Optional Hard Disk drive	N	160 GB	N	Certificate Storage, Fonts, Macros	“Clear Storage” option on LUI
Additional Information:					

Media and Storage Descriptions					
Type (disk drives, tape drives, CF/SD/XD memory cards, etc.):	Removable Y / N	Size:	User Modifiable: Y / N	Function:	Process to Clear:
N/A					
Additional Information:					

USB Port(s)	
Complete an entry for each USB port	
USB port and location	Purpose
USB 2.0 port	Enables computer connectivity for firmware upgrade..
Front Panel USB Port	Enables printing from USB drives
Additional Information: No data other may be sent to the USB port as this device is only a printer.	

RFID Devices	
Complete an entry for each RFID tag	
RFID Tag location	Purpose
NA	NA

Transmission Capabilities	
Complete an entry for each Non Wired Access Device	
Device	Purpose
NA Printer Only	NA

Other Communications Capabilities

Complete an entry for each Capability

Location	Purpose
NA	NA

Feeder and Finisher Module Descriptions

The text below details the information regarding the volatile and non-volatile memory contained in the Phaser 6600 supported feeders. This document lists the available options. Depending on the configuration purchased, your system will contain one or more of these devices. **NOTE: None of these devices store any job data in electronic form.**

Feeder Module Descriptions

Optional 550-sheet Feeder

The Feeder device never contains job data or Personally Identifiable Information. All memory inside the device is used for configuration settings and normal operation. Removal of any memory will void the warranty. Access to any memory is by system programs or diagnostics only.

Finisher Module Descriptions

The Phaser 6600 does not offer any standard or optional finishing modules.
