Document Version: 10.0 (March 2015).

Summary Information

A vulnerability has been discovered in the Bash command shell that can allow attackers to remotely execute commands on a target system. Even systems that do not allow remote command shell connections may still use Bash to execute commands in the Apache web server and other network-facing applications. The vulnerability was reported September of 2014 but has been determined to exist for at least 22 years in various versions of Bash. The only known solution for this vulnerability is to update Bash with a fixed version. Generally, all versions of Bash were fixed in late 2014.

Product Information

Supported Xerox products are listed below. The latest software version for each product includes a fix for this vulnerability. If you are in doubt, please have your device upgraded to the current version.

Monochrome Models		Affected
Phaser®	3020	No
Phaser®	3052/3260	No
Phaser®	3300	No
Phaser®	3320	No
Phaser®	3600	No
Phaser®	3610	No
Phaser®	3635 MFP	No
Phaser®	4600/4620	No
Phaser®	4622	No
Phaser®	5550	No
Monochrome Models		Affected
WorkCentre®	3025BI	No
WorkCentre®	3025NI	No
WorkCentre®	3210/3220	No
WorkCentre®	3215/3225	No
WorkCentre®	3315	No
WorkCentre®	3325	No
WorkCentre®	3550	No
WorkCentre®	3615	No
WorkCentre®	3655	No
WorkCentre®	4250	No
WorkCentre®	4260	No
WorkCentre®	4265	No
