Mini Bulletin XRX15AQ
Phaser 6500
WorkCentre 6505
Firmware Release PL9-R1

Release Date: Oct 1, 2015

Purpose

This Bulletin is intended ONLY for the specific security problem identified below. The problem identified has been rated a criticality level of **IMPORTANT**

Includes fix for:

- SSLv3.0 Poodle Vulnerability (CVE-2014-3566). SSLv3 supports an older encryption method that is no longer considered secure, and is no longer viable for protecting sensitive data in transmission over networks. This could allow a Man-in-The-Middle (MiTM) attack where a person on the network can force a "downgrade" of the session between a client and server to use SSLv3 instead of a more secure protocol such as TLS. Xerox has added an option to disable SSLv3 in the software version available below. Disabling SSLv3 removes vulnerability to this CVE.

Software Release Details

If your software is higher or equal to the versions listed below no action is needed.

Otherwise, please review this bulletin and consider installation of this version.

Model	Phaser 6500	WorkCentre 6505
Firmware version	201509291507	201509291535
Engine FW	02.00.06	02.00.06
