

Mini Bulletin XR16P

WorkCentre 7525/7530/7535/7545/7556

SPAR Release 061.121.226.12400

Release Date: Jun 30, 2016

Purpose

This Bulletin is intended ONLY for the specific security problems identified below. The problems identified has been rated a criticality level of **IMPORTANT**. This release includes OpenSSL 0.9.8zg.

Includes fix for:

- Multiple CVEs that were associated with Logjam. The following CVEs are fixed in this release.
 - CVE-2014-8176
 - CVE-2015-1788
 - CVE-2015-1789
 - CVE-2015-1790
 - CVE-2015-1791
 - CVE-2015-1792

This product was never vulnerable to the logjam (CVE-2015-4000) defect.

- CVE-2015-2808 Bar Mitzvah: The RC4 algorithm, as used in the TLS protocol and SSL protocol, does not properly combine state data with key data during the initialization phase, which makes it easier for remote attackers to conduct plaintext-recovery attacks against the initial bytes of a stream by sniffing network traffic that occasionally relies on keys affected by the Invariance Weakness, and then using a brute-force approach involving LSB values, aka the "Bar Mitzvah" issue. RC4 has been disabled in this release.

Software Release Details

If your software is higher or equal to the versions listed below no action is needed.

Otherwise, please review this bulletin and consider installation of this version.

Model	Workcentre 75xx
Firmware version	061.121.226.12400
Link to Software Release	Available here
Link to Installation Instructions	Available here

Save the file to a convenient location on your workstation. Unzip the file if necessary.
