

Xerox Security Bulletin XR17-025

Xerox® FreeFlow® Print Server v7 and v9

Media Delivery (DVD/USB) of: October 2017 Security Patch Cluster

Includes: Java 7 Update 161

Bulletin Date: November 22, 2017

1.0 Background

Oracle® delivers quarterly Critical Patch Updates (CPU) to address US-CERT-announced Security vulnerabilities and deliver reliability improvements to the Solaris Operating platform. Oracle® does not provide these patches to the public, but authorize vendors like Xerox® to deliver them to Customers with active FreeFlow® Print Server Support Contracts (FSMA). Customers who may have an Oracle® Support Contract for their non-FreeFlow® Print Server Solaris Servers should not install patches not prepared/delivered by Xerox®. Installing non-authorized patches for the FreeFlow® Print Server software violates Oracle® agreements, can render the platform inoperable, and result in downtime and/or a lengthy re-installation service call.

This bulletin announces the availability of the following:

1. October 2017 Security Patch Cluster
 - This supersedes the July 2017 Security Patch Cluster
2. Java 7 Update 161 Software
 - This supersedes Java 7 Update 151 Software

CAVEAT: We have a caveat with the October 2017 Security Patch Cluster for the FreeFlow Print Server 7.3 and 9.3 software releases. The FreeFlow Print Server application is not able to access remote SMB shares after installing the October 2017 Security Patch Cluster. This does not affect the SMB shares used for Hot Folder workflow. The affected capabilities are SMB access of remote job files by the 'Print From File' client, and storing PDF/TIFF files to a remote location over SMB from a hardcopy scan (E.g., commonly done on a Nuvera printer). It is not common for a Security conscience customer to use SMB workflows, so this should not affect many customers.

Note: Xerox® recommends that customers evaluate their security needs periodically and if they need Security patches to address the above CVE issues, schedule an activity with their Xerox Service team to install this announced Security Patch Cluster. Alternatively, the customer can install the Security Patch Cluster using the Update Manager UI from the Xerox® FreeFlow® Print Server Platform.

2.0 Applicability

The customer can schedule a Xerox Service or Analyst representative to deliver and install the Security Patch Cluster using media (DVD/USB). A customer can only perform the install procedures with approval of the Xerox CSE/Analyst. Xerox® does offer an electronic delivery and “easy to use” install of Security Patch Clusters, which is more suited for a customer to manage the quarterly patches on their own.

The Xerox Customer Service Engineer (CSE)/Analyst uses a tool (accessible from a secure FTP site) that enables identification of the currently installed FreeFlow® Print Server software release, Security Patch Cluster, and Java Software version. Run this tool after the Security Patch Cluster install to validate a successful install. Example output from this script for the FreeFlow® Print Server v7 software release is as following:

FFPS Release Version	7.0_SP-3_(73.H0.23.86)
FFPS Patch Cluster	October 2017
Java Version	Java 7 Update 161

The October 2017 Security Patch Cluster is available for the FreeFlow® Print Server Software Releases below:

FreeFlow® Print Server v7

Xerox® printer products running the FreeFlow® Print Server 73.H0.23 software release for the:

- Xerox Nuvera® 100/120/144/157 EA Digital Production System
- Xerox Nuvera® 200/288/314 EA Perfecting Production System
- Xerox Nuvera® 100/120/144 MX Digital Production System
- Xerox Nuvera® 200/288 MX Perfecting Production System
- Xerox® DocuPrint 100/115/135/155/180 MX Enterprise Printing System
- Xerox® DocuTech® 6128/6155/6180 Production Publisher
- Xerox® DocuTech® Highlight Color 128/155/180 Production Publisher
- Xerox® DocuColor® 242/252/260/700,
- Xerox® DocuColor® 5000AP
- Xerox® DocuColor® 7002/8002
- Xerox® DocuColor® 8080

- Xerox® Digital Printer 4112/4127 Enterprise Printing System
- Xerox® Digital 4590/4595 Copier/Printer

All previous FreeFlow® Print Server v7.3 software releases have not been tested with October 2017 Security Patch Cluster, but there should not be any problems on previous FreeFlow® Print Server 7.3 releases.

FreeFlow® Print Server v9

Xerox® printer products running the FreeFlow® Print Server 93.G4.74A software release for:

- Xerox® iGen® Products (iGen4, iGen150, Xerox® Color 8250 Presses)
- Xerox® Versant 80/2100 Presses
- Xerox® Color 800/100, 800i/1000i Presses
- Xerox® Color Press J75/C75 Presses
- Xerox® Color Press 560/570
- Xerox® Impika® Compact Inkjet Press
- Xerox® CiPress® 325/500 Production Inkjet System
- Xerox® Rialto® 900 Inkjet Press
- Xerox® D95/110/125/136 D95/110/125/136 Copier/Printers

All previous FreeFlow® Print Server v9.3 software releases have not been tested with October 2017 Security Patch Cluster, but there should not be any problems on previous FreeFlow® Print Server 9.3 releases.

3.0 Patch Install

Xerox® strives to deliver these critical Security patch updates in a timely manner. The customer process to obtain Security Patch Cluster updates (delivered on a quarterly basis) is to contact the Xerox hotline support number. Xerox Service or an analyst can install the Patch Cluster using a script utility that will support installing the patch cluster from the FreeFlow® Print Server hard disk, DVD, or USB media.

The Security Patch Cluster deliverables are available on a secure FTP site once they are ready for customer delivery. The Xerox CSE/Analyst can download and prepare for the install by writing the Security patch update into a known directory on the FreeFlow® Print Server platform, or on DVD/USB media. Delivery of the Security Patch Cluster includes an ISO and ZIP archive file for convenience. Once the patch cluster has been prepared on media, run the provided install script to perform the install. The install script accepts an argument that identifies the media that contains a copy of the FreeFlow® Print Server Security Patch Cluster. (e.g., # installSecPatches.sh [disk| dvd| usb]).

Important: The install of this Security patch update can fail if the archive file containing the patches is corrupted from file transfer or writing to DVD media. There have been reported install failures when the archive file written on DVD media was corrupt. Writing to media using some DVD write applications and media types could result in a corrupted Security Patch Cluster. The tables below illustrate Solaris checksums and file size on Windows for the Security Patch Cluster ZIP and ISO files. We provide these numbers in this bulletin as a reference to check against the actual checksum. The file size and check sum of these files on Windows and Solaris are as follows:

FreeFlow® Print Server v7

Security Patch File	Windows Size (Kb)	Solaris Size (bytes)	Solaris Checksum
Oct2017AndJava7U161Patches_v7.zip	2,343,021	2,399,253,366	61762 4686042
Oct2017AndJava7U161Patches_v7.iso	2,343,372	2,399,612,928	22912 4686744

Verify the Oct2017AndJava7U151Patches_v7.zip file contained on the DVD media by comparing it to the original archive file size and checksum. Copy this file to a location on the FreeFlow® Print Server platform and type 'sum Oct2017AndJava7U151Patches_v7.zip' from a terminal window. The checksum value should be '61762 4686042', and can be used to validate the correct October 2017 Security Patch Cluster on the DVD/USB.

FreeFlow® Print Server v9

Security Patch File	Windows Size (Kb)	Solaris Size (bytes)	Solaris Checksum
Oct2017AndJava7U151Patches_v9.zip	2,345,454	2,401,744,354	32726 4690907
Oct2017AndJava7U151Patches_v9.iso	2,345,804	2,402,103,296	63422 4927028

Verify the Oct2017AndJava7U151Patches_v9.zip file contained on the DVD media by comparing it to the original archive file size and checksum. Copy this archive to a location on the FreeFlow® Print Server platform and type 'sum Oct2017AndJava7U151Patches_v9.zip' from a terminal window. The checksum value should be '32726 4690907', and can be used to validate the correct October 2017 Security Patch Cluster on the DVD/USB.
