

Mini Bulletin XR18H

Xerox® WorkCentre® 3025/3215/3225 Firmware Release 3.50.02.XX

Bulletin Date: March 13, 2018

Purpose

This Bulletin is intended ONLY for the specific security problem identified below. The problem identified has been rated a criticality level of IMPORTANT.

Includes the following:

- A fix to address OpenSSL CVE-2016-6304, which may have allowed a denial of service attack to be applied to a memory leak.
- An issue was fixed in the IPv6 protocol implementation, related to ICMP Packet Too Big (PTB) messages (CVE- 2016-10142). This may have allowed a denial of service attack to be applied.
- The security protocol SSLv3 was removed and switches were added to allow disablement of TLS 1.0, TLS 1.1 and TLS 1.2 individually.

Software Release Details

If your software is higher or equal to the versions listed below no action is needed.

Otherwise, please review this bulletin and consider installation of this version.
