Purpose

This Bulletin is intended ONLY for the specific security problem identified below. The problems identified have been rated a criticality level of IMPORTANT.

Includes the following:

- The 3DES encryption protocol has been removed, which removes the possibility of the vulnerability known as Sweet32 (CVE 2016-2183) from being exploited.
- Anonymous FTP has been disabled. Any FTP attempt now requires valid authentication credentials.
- Update completed that prevents the possibility of wireless vulnerability known as Krack (Key Reinstallation Attack).

Software Release Details

If your software is higher or equal to the versions listed below no action is needed. Otherwise, please review this bulletin and consider installation of this version.
