

# Mini Bulletin XR18AJ

Xerox® ColorQube® 8700/8900

Xerox® ColorQube® 9301/9302/9303

SPAR Release 072.xxx.018.28400

Bulletin Date: October 31, 2018

## Purpose

This Bulletin is intended ONLY for the specific security problem identified below. The problem identified has been rated a criticality level of IMPORTANT. This release uses OpenSSL version 0.9.8zf.

Includes fix for the following:

- Vulnerability in libxml2 that could result in obtaining sensitive information (CVE-2015-8710)
- Vulnerability in libxml2 could result in a Denial of Service (CVE-2016- 4447)
- Multiple Web Server Vulnerabilities found by a UAE security researcher

## Acknowledgment

Xerox wishes to thank Imram Siddiqui from the United Arab Emirates for initially notifying us of some of these vulnerabilities.

## Software Release Details

If your software is higher or equal to the versions listed below no action is needed.

Otherwise, please review this bulletin and consider installation of this version.

Model	ColorQube 8700/8900	ColorQube 9301/9302/9303
System SW version	072.161.018.28400	072.180.018.28400
Link to SW update	<a href="#">Available here</a>	<a href="#">Available here</a>
Link to Install Instr	<a href="#">Available here</a>	<a href="#">Available here</a>

## Additional Installation Notes

### Scan to Home or Workflow Scanning Failures

In some environments scanning may not work after upgrading to this release. This problem was first seen with the 072.xxx.134.05000 version and still exists in this version. Included in the zip file is a patch for the SMB scanning issue that may occur after upgrading. If you experience scan problems, follow the instructions included in the patch zip file to apply the patch.

### Sender's Name in Scan to Email

If a user is logged into Email Services and Sender's Name feature has been enabled and set, selecting the clear all button will result in the Sender's Name not being displayed as the email 'from' address. Instead, the

'from' field of the email address will display the default or login user's name.

### **Custom Name Features**

- This feature does not support Bi-directional communication between the device and the Global Print Driver. Client Print Drivers will not display correct information for loaded trays on the device.
- ColorQube 9303 will support 80 Custom Names, and ColorQube 8700/8900 will support 10 Custom Names. The WorkCentre 58xx, WorkCentre 78xx, and WorkCentre 72xx will support 150 Custom Names.
- After upgrading (CWIS or Forced Altboot), you may see that email PDF Password is on by default. The default can be changed on the web UI. Navigate to the Email Setup web page and disable the feature as needed. Navigate to Services >Email >Setup >Defaults(tab)> Email Options – Edit (button).
