Xerox® AltaLink® B8045/B8055/B8065/B8075/B8090

Xerox® AltaLink® C8030/C8035/C8045/C8055/C8070

General Release 101.00X.019.20200

Bulletin Date: October 31, 2019

Purpose

This Bulletin is intended ONLY for the specific security problems identified below. The problems identified have been rated a criticality level of IMPORTANT. This SPAR release uses OpenSSL version 1.0.2s.

This is a general release that includes fixes for the following:

- Updates to comply with the 2020 California Password law (SB-327)
- Datamangement page is impacted by reflected cross-site scripting attack
- CVE-2018-5391: IP Fragment Reassembly DoS
- A customer vulnerability scan finding that Port 51333 which is used for the Fleet Orchestrator Feature was found open even though the Fleet Orchestrator Feature was disabled
- Role Analyzer.php and RoleServices.php are vulnerable to cross-site scripting
- Reflective cross-site scripting Vulnerability found in many web pages
- An authentication web page is vulnerable to session hijacking
- A data management web page is vulnerable to cross-site scripting
- OpenSSL Information Disclosure Vulnerability CVE-2019-1559

Important Notes:

1. These system software releases are based on the content and features that were present in system software version 101.xxx.008.27400 released Nov 2018. If your device is currently on a version greater than 101.xxx.008.27400, do not install system software version 101.xxx.019.20200.
2. The system software releases documented in this security mini-bulletin do not include any of the security vulnerability fixes documented in Security Mini-Bulletins XRX18AL, XRX19E, XRX19V and XRX19AI because the fixes made in those security bulletins were made to a different software baseline than the software baseline this general release was created from.
