

Xerox Security Bulletin XRX20-020

Xerox® FreeFlow® Print Server v2 / Windows® 10

Supports:

- Xerox® iGen®5 Press
- Xerox® Baltoro™ HF Production Inkjet Press
- Xerox® Brenva™ HD Production Inkjet Press

Deliverable: October 2020 Security Patch Update

Includes: OpenJDK 1.8.0-102020

Bulletin Date: November 23, 2020

1.0 Background

Microsoft® responds to US CERT advisory council notifications of Security vulnerabilities referred to as Common Vulnerabilities and Exposures (CVE's) and develops patches that remediate the Security vulnerabilities that are applicable to Windows® 10 and components (e.g., Windows® Explorer®, .Net Framework®, etc.). The FreeFlow® Print Server organization has a dedicated development team, which actively review the US CERT advisory council CVE notifications, and delivers Security patch updates from Microsoft® to remediate the threat of these Security risks for the FreeFlow® Print Server v2 / Windows® v10 (supporting the Integrated and Standalone platforms)

The FreeFlow® Print Server organization delivers Security Patch Updates on the FreeFlow® Print Server v2 / Windows® v10 platform by the FreeFlow® Print Server organization on a quarterly (i.e., 4 times a year) basis. The FreeFlow® Print Server engineering team receives new patch updates in January, April, July and October, and will test them for supported Printer products (such as iGen®5 printers) prior to delivery for customer install.

Xerox tests FreeFlow® Print Server operations with the patch updates to ensure there are no software issues prior to installing them at a customer location. Alternatively, a customer can use Windows® Update to install patch updates directly from Microsoft®. If the customer manages their own patch install, the Xerox support team can suggest options to minimize the risk of FreeFlow® Print Server operation problems that could result from patch updates.

This bulletin announces the availability of the following:

OpenJDK 1.8.0-102020

1. **October 2020 Security Patch Update**
 - This supersedes the July 2020 Security Patch Update
2. **Open JDK 1.8.0-102020 Software**
 - This supersedes Java 8 Update 251 Software
3. **Firefox v81.0.2 Software**
 - This supersedes Firefox v78.0.2

Java 8 Update 072020

See the US-CERT Common Vulnerability Exposures (CVE) list for OpenJDK 1.8.0-102020 software below:

Open JDK 1.8.0-102020 Software Remediated US-CERT CVE's			
CVE-2020-14779	CVE-2020-14792	CVE-2020-14781	CVE-2020-14798
CVE-2020-14782	CVE-2020-14797	CVE-2020-14796	CVE-2020-14803

See US-CERT Common Vulnerability Exposures (CVE) for the October 2020 Security Patch Update in table below:

October 2020 Security Patch Update Remediated US-CERT CVE's					
ADV990001	CVE-2020-16885	CVE-2020-16896	CVE-2020-16914	CVE-2020-16937	CVE-2020-16974
CVE-2020-1243	CVE-2020-16887	CVE-2020-16900	CVE-2020-16915	CVE-2020-16939	CVE-2020-16975
CVE-2020-1147	CVE-2020-16889	CVE-2020-16902	CVE-2020-16919	CVE-2020-16940	CVE-2020-16976
CVE-2020-1167	CVE-2020-16891	CVE-2020-16905	CVE-2020-16923	CVE-2020-16967	
CVE-2020-9746	CVE-2020-16892	CVE-2020-16909	CVE-2020-16924	CVE-2020-16972	
CVE-2020-16876	CVE-2020-16894	CVE-2020-16912	CVE-2020-16927	CVE-2020-16973	

See the US-CERT Common Vulnerability Exposures (CVE) list for the Firefox v 81.0.2 software below:

Firefox v 81.0.2 Software Remediated US-CERT CVE's					
CVE-2020-6463	CVE-2020-15652	CVE-2020-15657	CVE-2020-15665	CVE-2020-15673	CVE-2020-15678
CVE-2020-6514	CVE-2020-15653	CVE-2020-15658	CVE-2020-15666	CVE-2020-15674	
CVE-2020-6829	CVE-2020-15654	CVE-2020-15659	CVE-2020-15667	CVE-2020-15675	
CVE-2020-12400	CVE-2020-15655	CVE-2020-15663	CVE-2020-15668	CVE-2020-15676	
CVE-2020-12401	CVE-2020-15656	CVE-2020-15664	CVE-2020-15670	CVE-2020-15677	

Note: Xerox recommends that customers evaluate their security needs periodically and if they need Security patches to address the above CVE issues, schedule an activity with their Xerox Service team to install this announced Security Patch Update. The customer can manage their own Security Patch Updates using Windows® Update services, but we recommend checking with Xerox Service to reduce risk of installing patches that have not been tested by Xerox.

2.0 Applicability

This October 2020 Security Patch Update (including OpenJDK 1.8.0-102020 software, and Firefox v78.0.2 Patches) is available for the FreeFlow® Print Server v2 Software Release running on Windows® v10 OS. The FreeFlow® Print Server software releases tested with the October 2020 Security Patch Update installed per printer products is illustrated below:

Printer Products	Patch Update Tested Releases
iGen®5 Press	CP.24.0.18201.0
Baltoro™ HF Inkjet	CP.24.0.19114.0
Brenva™ HD Inkjet	CP.24.0.19119.0

All of the listed printer products were tested with each of the releases listed.

Security of the network, devices and information on a customer network may be a consideration when deciding whether to use the USB, or Windows® Update method of Security Patch Update delivery and install. Delivery and install of the Security Patch Update using Update Manager may still be a concern for some highly “secure” customer locations such as US Federal and State Government sites. Alternatively, delivery and install of Security Patch Updates from USB media may be more desirable for these highly Security sensitive customers. They can perform a Security scan of the USB media with a virus protection application prior to install. If the customer does not allow use of USB media for devices on their network, you can transfer (using SMB, SFTP, or SCP) the Security Patch Update to the FreeFlow® Print Server platform, and then install.

3.0 Patch Install

Xerox strives to deliver these critical Security Patch Updates in a timely manner. The customer process to obtain FreeFlow® Print Server Security Patch Updates (delivered on a quarterly basis) is to contact the Xerox hotline support number. The methods of Security Patch Update delivery and install are over the network using FreeFlow® Print Server Update Manager or directly from Microsoft® using Windows® Update service, and using media (i.e., USB).

We recommend the customer use the FreeFlow® Print Server Update Manager or Microsoft® Windows® Update method if they wish to perform install on their own. This empowers the customer to have the option of installing these patch updates as soon as they become available, and not need to rely on the Xerox Service team. Many customers do not want the responsibility of installing the quarterly Security Patch Update or they are not comfortable providing a network tunnel to the Xerox or Microsoft® servers that store the Security Patch Update. In this case, the media install method is the best option under those circumstances.

3.1 USB Media Delivery

Xerox uploads the FreeFlow® Print Server Security Patch Update to a “secure” SFTP site that is available to the Xerox Analyst and Service once the deliverables have been tested and approved. The FreeFlow® Print Server patch deliverables are available as a ZIP archive, and a script used to perform the install. The Security Patch Update installs by executing a script and installs on top of a pre-installed FreeFlow® Print Server software release. The install script includes options to install the Security Patch Update directly from USB media or from the FreeFlow® Print Server internal hard disk. A PDF document is available with procedures to install the Security Patch Update using the USB media delivery method upon request.

If the Analyst supports their customer performing the Security Patch Update, then they must provide the customer with the Security Patch Update install document and the Security update deliverables. This method of Security Patch Update install is not as convenient or simple for customer install as the network install methods offered by Update Manger.

See the Security Patch Update deliverable filenames and sizes in the table below:

Security Patch File	Windows® Size (K-bytes)	Size in Bytes
FFPSv2-Win10_SecPatchUpdate_Oct2020.zip	5,232,953	5,358,543,459

3.2 Windows® Update Delivery

Windows® Update services enables information technology administrators to deploy the latest Microsoft® product updates to computers that are running the Windows® operating system. By using Windows® Update service, administrators can fully manage the distribution of updates released through Microsoft® Update to FreeFlow® Print Server platforms on their network.

Microsoft® uploads the Patch Updates to a server that is available on the Internet outside of the Microsoft® Corporate network once patch deliverables have been tested and approved. Installing the Security patches directly from Microsoft® using the Windows® Update service brings some risk given they have not been tested by Xerox on the FreeFlow® Print Server platform. It is required that the customer proxy server information be configured on the FreeFlow® Print Server platform so that the Windows® Update service can gain access to the Microsoft® server over the Internet outside of the customer network. Xerox is not responsible for the Security of the connection to the Microsoft® patch server.

We recommend manually performing a FreeFlow® Print Server System Backup and a Windows® Restore Point backup just prior to checking for the Windows® patch updates and installing them. This will give assurance of FreeFlow® Print Server system recovery if the installed Security patches create a software problem or results in the FreeFlow® Print Server software becoming inoperable. The Security Patch Update makes changes to only the Windows® 10 OS system, and not the FreeFlow® Print Server software. Therefore, the restore of a Windows® Restore Point (prior to patch install) will reverse install of the Security Patch Update if recovery is required and is much faster than the full FreeFlow® Print Server System Restore. We recommend performing a full FreeFlow® Print Server System Backup for redundancy purposes in case the checkpoint restore does not work. The only option for FreeFlow® Print Server system recovery may be the FreeFlow® Print Server System Backup if the system should become inoperable such that Windows® is not stable. Make sure to store the FreeFlow® Print Server System backup onto a remote storage location or USB media.
